WEBSITE HOSTING PLAN

# $29 / month

or $313/year paid up front (save 10%)

I keep your website live, secure and backed up, so you never have to think about it. No hosting company logins, no support tickets. If something isn't working, text or email me and I fix it, at no extra charge.

## What's included

### Keeping it online

- Fast hosting on a global network (Netlify)
- HTTPS security certificate, renewed automatically
- Domain and DNS managed (Namecheap)
- 24/7 uptime monitoring (UptimeRobot), and fixes if anything breaks

### Keeping it safe

- Complete code history, plus daily and weekly database backups
- One-click rollback if a change goes wrong
- Database and login security maintained
- Adjustments when a service changes on its end

### Keeping it working

- Contact and booking forms delivered to your inbox
- Payments (Stripe) or online store (Shopify) connection maintained, if you have one
- Admin portal kept running, if you have one

### Changes when you need them

- Content updates whenever you ask, billed by the hour
- A price before I start, every time
- A direct line to me, not a support queue

## Updates

Need a change? Send it over. Updates are **billed by the hour**, and I'll tell you the cost before I start. Most requests are live within one to two business days. Fixing something that broke is always included.

### Typical updates

- New hours, prices, menu items or rates
- Swapping photos or adding a few new ones
- Editing text, announcements or seasonal specials
- Updating contact details or links

### Quoted as a project

New pages, a redesign, or new features like online booking, payments or a customer portal. I'll give you a flat price before I start.

## Not included

- **Domain renewal.** Your domain stays registered in your name, and you pay its yearly renewal directly (typically $15 to $20 a year).
- **Payment and store fees.** Stripe charges a small fee per card payment, with no monthly fee. If your site includes a Shopify store, your Shopify plan and its card fees are billed by Shopify directly.
- **Paid service upgrades.** Almost every small-business site stays on free service tiers. If your traffic or data ever outgrows them, I'll tell you the cost before anything changes.
- **Updates and new work**, billed as described above.

## You own everything

Your code, domain, data, and Stripe or Shopify account all belong to you. There's no long-term contract, and you can change plans anytime. If you ever cancel, I hand over the code, accounts and logins so you or another developer can take it from there.

## How it compares

| | Blue Frontier Labs | DIY builder (Squarespace, Wix) |
|---|---|---|
| Monthly cost | $29 | About the same for a business plan |
| Website | Custom-built for your business | Template |
| Who makes updates | Me, whenever you ask | You |
| Support | Text or email me directly | Help articles and support tickets |
| If you leave | You keep the code and all accounts | Site stays locked in the builder |
